DETAILED ACTION

1. In view of the Appeal Brief filed July 8th, 2006, prosecution is now reopened.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 58, 62-128, 132-144, 146-150 and 154-194 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

- a. Applicant disclose "a first instance of digital information, a second instance of digital information, first portion of functional data, second portion of functional data," that are not describe in the specification. Examiner does not fully understand what Applicant is claiming to be the inventive concept.

4. Claims 58, 62-128, 132-144, 146-150 and 154-194 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a *specific and substantial* asserted utility or a well established utility.

Art Unit: 3621

- b. Applicant disclose “a first instance of digital information, a second instance of digital information, first portion of functional data, second portion of data,” that are not describe in the specification. Examiner does not fully understand what Applicant is claiming to be the inventive concept.
5. Claims 58, 62-128, 132-144, 146-150 and 154-194 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a *specific and substantial* asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.
6. Note: Applicant is advised to review the specification to ensure that every claimed subject matter is fully described in the specification in such a way as to reasonably convey to one skilled in the relevant art.
